

Wireshark Assignment

Name : Rohit

Roll No. : 2415001319

Batch : Ethical hacking

E1. Download and analyze the network file; find the number of DHCP messages.	5
E2. Analyze the network file and find the number of ARP messages.	680

E3. Analyze the network file and find the IP address that accessed 'baidu.com'.	10.103.51.159
E4. Analyze the network file and find the number of packets the IP address 10.103.0.20 sent.	469
E5. Analyze the network file and find the number of UDP packets.	9102
E6. Analyze the network file and find the number of SMB packets.	518
E7. Analyze the network file and find the number of packets sent to the source IP address 10.103.0.20.	547
E8. Examine the network file and isolate only the IPv4 traffic; determine the count of packets shown.	24906

E9. Analyze the network file and examine the last SMB packet; identify the source IP address.

10.103.50.202

E10. Analyze the network file and find the MAC address of the IP 151.139.128.14.

00:1c:7f:6c:96:3f

TCP Segment Len (tcp.len)

E19. Examine the network file; what is the number of packets sent to the destination IP address 204.79.197.200?

116

The image shows a Wireshark packet capture analysis. The top pane displays a list of packets. The middle pane shows the details of a selected packet (Frame 15902), which is an Ethernet II packet from Hewlett-Packard (10:60:4b:78:cd:4a) to CheckPoint Software (00:1c:7f:6c:96:3f). The packet is an IPv4 packet with a destination of 204.79.197.200. The bottom pane shows the raw packet data in hexadecimal and ASCII.

E20. Analyze the network file and find the MAC address associated with the IP address 204.79.197.200. To which vendor does this MAC address belong?

MAC:
00:1c:7f:6c:96:3f

Vendor:
Check Point Software Technologies
